The Alavida Skin Care System protects skin inside out & outside in!

Alavida uses only Clean Ingredients!
This is because anything bad that goes into your skin will go directly into your blood.

Alavida Reduces Oxidative Stress.
The Alavida patch elevates a peptide in the pineal gland that tells the body to reduce oxidative stress. Oxidative stress is the free radical damage to the cells of our body including our skin.

Look at the picture below: The change to the full turquoise means that oxidative damage is being repaired and therefore so is the energy flow.
